

## Hosted Email Exchange

### Email Exchange Key Features:

- Data is automatically stored and backed up in secure UK datacentres.
- Multiple site access across the world to keep companies on brand.
- No annual license fees, purchase what you need month by month.

### Why Hosted Email Exchange?

This solution has now been successfully operating for many years and delivers emails securely and on a worldwide scale every single day.

Emails can be accessed from any device and provide standardisation across any business. As a completely managed service, the Business Hive team can make changes on request, as and when needed.

The service provides a corporate email solution without a large price tag as there is no need for in house servers, plus no annual license or maintenance fees.

## Benefits:

- Completely managed email solution
- Simple monthly payments per user
- The ability to receive email from any device, anywhere
- Standardisation across the business with global signature changes
- Options on additional email 10 year archive facility
- Email secured, encrypted and backed up offsite

The Business Hive hosted email exchange gives all the features of an on premise Microsoft Exchange server solution, but securely backed up and hosted in an offsite datacentre. Each client setup is specifically designed to meet the needs of the business. The service can be purchased on a monthly basis per user.

Access from any device, PC, Tablet or Smartphone, 365 days a year as long as there is an internet connection. Multiple sites can access one central email system across the world, helping the company stay on brand. It also includes the ability to share calendars and group distribution options, normally only available with corporate products.

All emails, calendar items and tasks are stored on Business Hive equipment in a UK datacentre. The system is extremely secure and uses encryption to transfer data to and from the client's location. The service also includes built in advanced Anti-spam and Anti-virus filtering, as well as an option for a 10 year email archive facility.

### Also included in this service.....

Things change and as part of the Hosted Email solution, the Business Hive team provide and manage upgrades as and when required. This includes the management and migrations of data when a new version of Microsoft platform is introduced onto the market.

### Why not think about.....

Through your I.T. partner The Business Hive offer a full range of **Internet Connectivity Services** to suit any type of business. Leased lines are delivered as a fully managed service and are essential for an organisation that needs high performance and reliability.
